

Septic company, Georgia: \$94k in jobs from customers they already had

Pumping, repair and installs, four trucks. Emergencies at night went to voicemail, and the pumping schedule lived in the owner's head.

+\$94k

in rebooked pumping and installs, six months

1,240

past customers called back for pumping due

88%

of after-hours calls answered

• Where the money was leaking

- A backed-up system at 9 pm rang through to voicemail. The next name on the list got the job.
- Years of pumping records, and nobody ever called those customers back.
- Install quotes went out and waited for the homeowner to remember.

• What we built

Call coverage, day and night

Every call answered, qualified, booked on the calendar.

Follow-up until yes or no

Open estimates chased automatically. Old customers called back.

Back office on autopilot

Invoices, review requests, reminders, reports.

• Before and after

	BEFORE	AFTER
Emergencies	A backed-up tank at 9 pm went to voicemail.	• Answered in seconds, dispatched, the job is his.
Old customers	Tanks pumped years ago, nobody called them back.	• Every customer gets a call when their pumping is due.
Install quotes	Sent, then waiting on the homeowner.	• Followed up until a yes or a real no.
Evenings	Invoices, reminders and paperwork after the last job.	• Running in the background. Evenings are his again.

"The work was sitting in our own files the whole time. We just never called."
